

FEN Logo + Icon + Intro Animation Developer Handoff

This handoff defines how to implement the detailed vine logo, the simplified app icon derived from it, and the revised intro animation so the product feels premium, organic, and memorable.

1. Asset set

- FEN_Master_Brand_Artwork.png = detailed master artwork. Use for splash references, brand decks, and larger brand placements.
- FEN_App_Icon_From_Master.png = simplified icon derived from the master artwork. Use for launcher/app icon and small-size brand usage.
- FEN_Splash_Artwork.png = splash artwork reference showing the dark brand environment and centred organic mark.

2. Where each asset must be used

Asset	Use
FEN_App_Icon_From_Master.png	iOS app icon, Android launcher icon, favicon/app icon source
FEN_Master_Brand_Artwork.png	Brand reference, website hero, marketing assets, onboarding reference
FEN_Splash_Artwork.png	Splash screen visual reference only; dev should recreate layout natively for best quality

3. Intro animation — revised to match the new logo

- Background: deep purple/black gradient (#0B0714 base) with soft violet ambient glow behind the mark.
- Main object: use the organic twisted vine pin, not the older smiley pin and not the plain minimal pin.
- Animation length: 1.6 to 2.2 seconds maximum.
- Sequence:
 - A. Fade + scale in the organic mark from 92% to 100% over ~350ms.
 - B. Add a subtle organic twist / settling motion over ~500ms, as if the strands have just tightened into place.
 - C. Tiny flower bloom accents: 2–3 small purple flowers brighten/pop very subtly, not cartoonishly.
 - D. Soft glow pulse once behind the logo over ~300ms.
 - E. Fade in the FEN wordmark underneath over ~250–350ms.
- No harsh bounce, no emoji-style movement, no spinning.
- The motion should feel premium, alive, and natural — more like a living emblem settling into place than a playful mascot.

4. Composition rules

- Use the icon as the hero on splash; the wordmark is secondary.
- Keep the splash centred and uncluttered.
- Do not put the full detailed logo on every in-app screen.
- Use the simplified icon for very small placements and the detailed artwork only where it has room to breathe.
- Preserve the dark background family so the purple flowers and green vine remain vivid.

5. Brand feel to preserve

- Organic, not corporate
- Premium, not cheap
- Distinctive, not generic

- Alive and rooted, not flat
- Warm and memorable, not childish

6. Do not do these

- Do not revert to the smiley-face pin.
- Do not replace the organic mark with a plain geometric map pin.
- Do not overanimate flowers or make them feel like stickers.
- Do not flatten the background to plain black if it kills depth.
- Do not stretch, recolour, or simplify the icon so much that the twisted vine identity is lost.

7. Visual references
