

FEN Brand & Positioning Pack

This document defines exactly how FEN should feel, look, and communicate. It ensures developers and designers build it right.

Core Positioning

FEN is not a gig marketplace. It is a fast, local help network designed for everyday people.

Primary statement:

“FEN helps people get quick, local help or earn money nearby without complexity.”

Key Differentiators

- Speed-first: built for urgent, same-day help
- Designed for normal people (not freelancers)
- Minimal setup, no complex profiles
- Anti-ghosting reliability system
- Hyper-local community focus
- Low barrier to earning

Brand Personality

- Friendly and human
- Simple and clear
- Trustworthy, not corporate
- Calm, not overwhelming
- Inclusive for older users

Tone of Voice Rules

- Use plain English
- Short sentences
- Avoid jargon (gig, hustle, marketplace)
- Speak like a helpful person, not a system
- Be reassuring and clear

Tagline Options

- Get help nearby, fast
- Local help, when you need it
- Post a job. Get help today
- Real people. Real help. Nearby

UI Style Direction

- Primary colour: violet/purple
- High contrast for readability
- Large text and buttons
- Clean, uncluttered layout
- Simple cards for jobs
- Clear status indicators

UX Principles

- Every action should feel obvious
- Reduce steps wherever possible
- Show only essential information
- Avoid overwhelming screens
- Prioritise speed over features

Onboarding Messaging

Screen 1:

“Need help nearby?”

Screen 2:

“Post a job and get help fast.”

Screen 3:

“Or earn money helping others locally.”

About Page Copy

FEN is built to make everyday help simple.

Whether you need help with something small or want to earn money nearby, FEN connects real people in your local area.

No complicated profiles. No long processes. Just real help, when you need it.

What FEN is NOT

- Not a freelance marketplace
- Not a bidding platform
- Not complex or corporate
- Not focused on long-term contracts

Developer Interpretation Rules

- Prioritise simplicity over feature richness
- Never add unnecessary steps
- Do not expose private location data publicly
- Do not introduce complexity without purpose
- Always favour clarity over cleverness

Final Definition

FEN = Fast, simple, local help between real people.

If a feature does not support speed, simplicity, or local trust, it should not be in the MVP.
